manufacturing and production networks and iii it outlines a strategic plan for the transition from industry 4 0 to industry 5 0 written by an international group of expert scientists this volume offers an overview of the most recent research in the field and provides actionable insights to benefit audiences in both academia and industry appeals to readers with its systematic and coherent approach that includes fundamental theoretical concepts as well as applied practical knowledge includes state of the art information on disruptive smart manufacturing technologies real life case studies of their impact in business scenarios and gap analysis creating an evidence based path to recognize the opportunities and challenges originating from an industry 4 0 to industry 5 0 transition serves as a guide to the next generation of engineers and facilitates making the next manufacturing paradigm a reality

this book provides an insight on the importance that internet of vehicles iov solutions can have in taking care of vehicular safety through internetworking and automation key features of the book are the inclusion and elaboration of recent and emerging developments in various specializations of intelligent transportation systems and their solutions by incorporating iot internet of things and iov this book presents to its readers useful iov applications and architectures that cater to their improved driving requirements and lead towards autonomous driving the application domains have a large range in which vehicular networking communication technology sensor devices computing materials and devices iot communication vehicular and on road safety data security and other topics are included

recent progress in ict has exceeded our expectations for meeting the requirement of multimedia society in the 21st century the fsoc is considered to be one of the key technologies for realizing very high speed multi gbps large capacity terrestrial and aerospace communications in fsoc the optical beam propagation in the turbulent atmosphere is severely affected by various factors suspended in the channel wavefront aberration correcting with continuous beam alignment are the key

requirements for a successful installation of an fsoc system which are the main contributions in our book establishment of fsoc setups development of accurate weather station measurement of atmospheric attenuation att and turbulence strength cn2 development of new models to predict the att and cn2 design of response surface model and artificial neural network based on controller implementation of neural controller in fpga and attaining the ber of 6.4×10^{-9} during different outdoor environments all the original contributions newness findings and experimental results etc are reported in the book subject of work wireless optical communication the content of the book can be referred by various application designers and or academicians for working on fsoc transceiver design laser cutting laser metrology laser surgery beam focusing pointing beacon positioning and coupling etc further all necessary matlab and vhdl codes are also given on appropriate pages for the readers quick clear understanding

the field of computational intelligence has grown tremendously over that past five years thanks to evolving soft computing and artificial intelligent methodologies tools and techniques for envisaging the essence of intelligence embedded in real life observations consequently scientists have been able to explain and understand real life processes and practices which previously often remain unexplored by virtue of their underlying imprecision uncertainties and redundancies and the unavailability of appropriate methods for describing the incompleteness and vagueness of information represented with the advent of the field of computational intelligence researchers are now able to explore and unearth the intelligence otherwise insurmountable embedded in the systems under consideration computational intelligence is now not limited to only specific computational fields it has made inroads in signal processing smart manufacturing predictive control robot navigation smart cities and sensor design to name a few recent trends in computational intelligence enabled research theoretical foundations and applications explores the use of this computational paradigm across a wide range of applied domains which handle meaningful

information chapters investigate a broad spectrum of the applications of computational intelligence across different platforms and disciplines expanding our knowledge base of various research initiatives in this direction this volume aims to bring together researchers engineers developers and practitioners from academia and industry working in all major areas and interdisciplinary areas of computational intelligence communication systems computer networks and soft computing provides insights into the theory algorithms implementation and application of computational intelligence techniques covers a wide range of applications of deep learning across various domains which are researching the applications of computational intelligence investigates novel techniques and reviews the state of the art in the areas of machine learning computer vision soft computing techniques
